DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7,9-12,14-15,17-29 and 84, drawn to a position sensor in a mobile device, classified in class 340, subclass 531.
 - II. Claims 13, 30-46 and 63-73, drawn to an acceleration sensor in a mobile device, classified in class 340, subclass 669.
 - II. Claims 16, 47-62 and 74-84, drawn to an atmospheric sensor in a mobile device, classified in class 454, subclass 72.

2. Inventions I, II and III are directed to related a sensor in a mobile device. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed in groups I, II and III are distinct as explained above, group I relates to a position sensor in a mobile device, group II relates to an acceleration sensor in a mobile device and group III relates to an atmospheric sensor in a mobile device. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be

traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
